

UNIVERSITY OF DELAWARE  
**PROFESSIONAL &  
 CONTINUING STUDIES**

# Professional Safety Training Institute

## Transform your career and your workplace as a trained safety practitioner

The University of Delaware's Division of Professional and Continuing Studies partners with the Delaware Valley Safety Council to offer training for entry-level to experienced safety professionals as well as organizational leaders focused on promoting workplace safety culture and performance excellence. All programs are taught by Authorized OSHA Outreach Trainers only and meet Monday through Friday, 8 a.m.–5 p.m., at 501 South College Ave., Newark, Del. All course materials are included in the program price.

### Certified Occupational Safety Specialist (COSS)

**Become a trained safety practitioner**

The COSS designation is recognized nationwide for its rigorous standards and outstanding curriculum, and is endorsed by the American Association of Safety Councils and the American Council for Construction Education. COSS graduates are able to teach their employees and colleagues how to work safely and eliminate the risk of fatalities and near misses—and avoid safety violations and OSHA citations. Topics include:

- Safety psychology
- The true cost of an accident
- Hazard recognition
- Starting a health and safety program
- Behavior-based safety

COSS is recommended for entry-level safety professionals as well as experienced safety practitioners wishing to stay current in the field.

**PREREQUISITE:** High school diploma or equivalent.

**SCHEDULE:** April 8–12, Aug. 5–9 or Oct. 21–25, 2019

**PRICE:** \$2,649

### Certificate for Occupational Safety Managers (COSM)

**Advanced safety training for occupational safety professionals**

This advanced, executive level safety program focuses on safety processes and procedures, and building the safety culture to lead your company toward excellence. Topics include:

- Essentials of safety management
- Strategic planning and evaluating
- Managing risk (hazards and analysis), safety finances and workers' compensation
- Communicating the safety message
- Injury management, incentives and discipline
- Claims and investigation in post-accident management

This program benefits all organizational safety leaders involved in processes and decision-making as well as other managers and professionals charged with workplace health and safety for their organizations.

**PREREQUISITE:** Minimum two years of safety, health or environmental work experience.

**SCHEDULE:** Sept. 30–Oct. 4, 2019

**PRICE:** \$2,749

### Safety Leadership and Planning

**Building safety excellence by enhancing human performance in the workplace**

Every organization needs safety leaders, managers and professionals who are focused on promoting an organization's safety culture and values while championing the drive toward safety excellence. The course also covers implementation of system safety with a focus on enhancing human performance and significantly reducing incidents in the workplace. Topics include:

- Human behavior and human error
- Behavior-based safety systems
- Risk management and hazard analysis
- Safety management planning
- Leadership and communications
- Development of a safety training program

Designed to be highly engaging and requiring active class participation, the course includes in-class and homework projects.

**PREREQUISITE:** While geared toward upper level safety professionals, any experienced safety professional will benefit from this course.

**SCHEDULE:** March 25–29, 2019

**PRICE:** \$2,295
