

Hand and Finger Injury Protection

Powered by: *United Academy*[®]

GBCA, in partnership with United Academy, is pleased to offer an online training course for Hand and Finger Injury Protection. Almost 1/3 of industrial accidents that involve body parts affect the hand and fingers. This course provides an overview of the safety precautions required to prevent hand and finger injuries.

IN THIS COURSE, STUDENTS LEARN:

- Identify the primary types of hand and finger injuries in the workplace
- Identify the main hazards for mechanical and hand tool accidents
- Describe safe practices for working around equipment
- Describe effective engineering and administrative controls to increase hand and finger safety
- Recognize the importance of PPE
- Identify the purpose and correct use of machine guards

COURSE DETAILS:

- Available online, anytime

- Offered in English
