

Respirable Crystalline Silica Training

Powered by: *United Academy*

GBCA, in partnership with United Academy, is pleased to offer an online training course for Respirable Crystalline Silica. This course serves as introductory awareness training for employees with limited exposure or potential exposure to silica and respirable crystalline silica dust.

IN THIS COURSE, STUDENTS LEARN:

- What is included in the new OSHA regulation (CFR 1926.1153)
- Basic health hazards associated with exposure to silica and respirable crystalline silica dust
- Common construction tasks that could result in exposure
- Typical control measures employers may implement to protect workers

COURSE DETAILS:

- Available online, anytime

- Offered in English
