

Sheri Timpanelli
Doctor of Nursing Practice
Assistant Vice President of Clinical Services –
WORKNET Occupational Medicine

OSHA-VPP Philadelphia Area Virtual Best Practices Workshop 2021

COVID-19 *What We Have Learned & What We Are Still Learning*

Our Presenter Doctor Sheri Timpanelli earned a Master's Degree from Rowan University, and a Doctoral Degree from Villanova University in 2014. Dr. Timpanelli provides the technical guidance and support for the Clinical Staff and Worknet Clients during the pandemic. Sheri developed Standard Operating Procedures for patient care and staff safety for 18 clinics. Sheri supported clients with quarantining and return to work procedures following the recommendations of the CDC. She serves as an ongoing resource for clients and staff for COVID-19 questions regarding safety, testing, return to work, site shut-down, quarantine, and vaccination. Sheri developed procedures for vetting and testing products for mass on-site COVID-19 testing. Sheri's doctoral studies focused on vaccinations, and that has served to be a strong platform for her planning and administration of vaccination to clients through Worknet's 18 clinics.

What We Have Planned: Dr. Timpanelli will discuss many of the lessons she has learned from her clinics and clients through the pandemic:

- Occupationally exposed “Long Haulers” and their impacts on the workplace
- The tough decisions faced by employers during the pandemic
- Keeping pace with CDC guidance
- Where we failed and incurred occupational exposures
- The vaccine technology is not new and what we need to understand about the vaccines

Dr. Timpanelli was the go to person with questions for her clinics and clients throughout the COVID-19 experience. We anticipate a lively question and answer discussion that will further confirm how much we have learned through the trials of 2020 and how much we continue to learn moving towards the end of the pandemic.

Date and Times: Thursday, April 22, 2021, 12:00 PM to 1:30 PM Treat yourself to this Lunch & Learn!
