REGISTER

Hosted and Presented by:

The 3-part Education Series is hosted by ZenTek Consultants, the nationally recognized leader in construction technologies. ZenTek Consultants works with Architecture, Engineering, Construction, and Manufacturing firms to help them purchase and implement the software they need to grow in these complex industries.

Presenter:
James Coppinger
Owner, ZenTek Consultants

James Coppinger has over 30 years of experience in the design/build industry, working in estimating, project management, and both architectural/civil design. Mr. Coppinger is a noted speaker and writer on best practices for implementing practical software solutions in the AEC community. Since founding ZenTek Consultants in 2016 with his partner Rocco Parisi, they have helped hundreds of firms implement, configure, and optimize their design/build workflows. Mr. Coppinger is also the host of The CADDle Call podcast - the leading, nationally acclaimed resource on design/build technology.

PRESENTED BY MICROSOL RESOURCES

Monday, October 31, 2022, 12:00pm – 1:30pm
Bluebeam Revu V21 – Big Changes for Construction!

Bluebeam Revu V21 is here, and it's got major changes focused on the construction world and how we work. Bluebeam Cloud is here, a way to create, control, track, and respond to all your RFIs, Submittals, and Punch Lists from one central location. There are also new geolocation insights in V21 to help you identify markups and issues in real world locations. We'll also discuss the amazing updates to standard Revu tools you know and love and cover all the new pricing and licensing models. ZenTek Consultants, the nationally recognized leader in construction technologies, will show you all the powerful new features in Bluebeam. This class is for anyone in the construction industry who uses, or is interested in using, Bluebeam Revu.

Tuesday, November 1, 2022, 12:00pm – 1:30pm
Procore for Subcontractors

We've all heard of Procore and maybe dabbled with it a bit, but for subcontractors who don't have their own Procore account up and running, working with General Contractors in that environment can be daunting. Are you unsure how to submit a bid, or respond to submittals in someone else's Procore system? Don't worry, it's not as complicated as you think! ZenTek Consultants, the nationally recognized Certified Procore Consultants, will show you how. This class is for anyone in the construction industry who uses, or is interested in using, Procore. We'll show you how to:

- Submit a Bid
- Approve Commitments
- Monitor Project Activity
- Track RFIs
- Respond to Submittals
- Respond to Punch Items

Thursday, November 3, 2022, 12:00pm – 1:30pm
Microsoft Office 365 Tools for Construction

Microsoft Office 365 is the most used technology tool in the construction world. We all have it, but we don't always make use of it for more than basic email and maybe typing up some reports in Word. In this class, we want to take you through some of the Office 365 tools that you already own and discuss how they can be used in your firm to improve communication, collaboration, and information gathering. You already own everything you need to take your business to the next level, win more work, and be more profitable. You just need someone to show you how! ZenTek Consultants, the nationally recognized leader in construction technologies, will show you how. This class is for anyone in the construction industry who has Office 365. We'll discuss best practices for using:

- Microsoft Teams
- SharePoint
- OneDrive
- To Do App
- Power BI
